

FIBER

THE COMMERCE LAYER FOR AI AGENTS

Seed Round — March 2026

Every platform shift creates a **new commerce winner**

1995	Humans browse the web	→ Google wins search
2007	Humans use phones	→ Amazon wins mobile commerce
2025	Agents act for humans	→ Fiber wins agentic commerce

AI agents are going mainstream — **fast**

Every major lab is shipping agents

OpenAI: "Agents are our #1 priority for 2025"

Anthropic: Claude uses computers autonomously

Google: Gemini integrated into every device

Apple: Siri rebuilt on LLMs

And people are running personal agents

OpenClaw: Personal AI agents on home hardware

100K+ people running agents at home

Growing 3x every 6 months

But none of them can shop.

Nobody has built commerce infrastructure for agents.

Shopping today is **broken**

Amazon knows you — but optimizes for *their* margin

Recommendations prioritize products that make Amazon money, not products that are best for you

50,000 merchants — impossible to compare

Better deals exist at Nike, REI, Finish Line, Target... but who has time to check all of them?

Cashback is scattered and forgotten

Points, rewards cards, browser extensions — \$50B in cashback goes unclaimed every year

The real problem: nobody is shopping *for* you

No agent, no AI, no service that truly knows you and acts in your interest

Your AI agent **knows you**

It searches every merchant. Finds the best deal. Earns you cashback.

Your agent knows:

Your style — minimalist, streetwear, classic

Your sizes — shoe 10, shirt M, jeans 32

Your budget — \$50–200 per item

Your values — sustainable, ethical, local

Your history — what you loved, returned

"Find me running shoes"

Agent searches all merchants

Finds YOUR best match

You just say yes.

How Fiber Works

The Bridge: **Today** to **Tomorrow**

TODAY (2025)

99% of people **don't** run personal AI agents

Fiber hosts your "agent soul" in the cloud

Same personalization. No hardware.
No setup. Just sign up and shop.

→ Capture millions of users immediately

FIBER
BRIDGE

TOMORROW (2028+)

Everyone has a **personal AI agent**

Agents connect to Fiber's commerce API

Full autonomy. Full privacy.
Your agent, your rules.

→ We already own the protocol layer

We capture the market **now**. We own the protocol **later**.

Three Layers

Soul Engine

Stores your preferences: taste, sizes, budget, values.
Encrypted, private, grows smarter with every purchase.

Like a SOUL.md for every user

Commerce API

Any AI agent can query Fiber. Searches 50,000+ merchants simultaneously. Real-time price comparison.

MCP-compatible protocol

Rewards Layer

Earn cashback on every purchase. Choose: keep it on Fiber (simple) or send to your crypto wallet.

Your choice. No lock-in.

Market Opportunity

\$5.3T

Global E-Commerce (TAM)

\$500B

Agent-Influenced Purchases (SAM)

\$1.5B

Year 3 Target GMV (SOM)

The Window

✓ Agent adoption **doubling every 6 months**

✓ Cashback market: **\$50B+ and growing**

✓ Zero infrastructure competitors **today**

🕒 **12–18 month window before this gets crowded**

Business Model

How we make money

Unit Economics

Avg Order Value	\$150
Purchases / user / month	2
Take Rate	~3%
Revenue / active user / month	\$9
CAC (organic / protocol)	\$2-5
LTV (12 months)	\$80-110
LTV : CAC	20:1+

Shopify-tier economics from day one

What We've Built

✓ Live product — search, compare, cashback

✓ 50,000+ merchants integrated

✓ Multi-source search engine

✓ AI chat interface (Claude-powered)

✓ Wallet integration (MetaMask)

✓ Agent protocol (MCP-compatible)

LIVE DEMO

Search "nike shoes"
→ Results from 6 merchants
→ Price comparison
→ Cashback calculated
→ One-click purchase

Built in weeks. Imagine what we build with funding.

The Ask: \$3M Seed

Use of Funds

 Engineering	45% — \$1.35M
 Growth	25% — \$750K
 Partnerships	20% — \$600K
 Operations	10% — \$300K
18-month runway to Series A	

Milestones

Month 6	Soul Engine live 50,000 users
Month 12	Agent protocol adopted by 3+ platforms 200,000 users
Month 18	Series A ready 500,000 users • \$500K MRR
This round proves three things: 1. Users want agent-powered shopping 2. Merchants convert through Fiber 3. Unit economics hold at scale	

In 5 years, AI agents will handle most shopping decisions.

**The winner builds the
infrastructure they use.**

That's Fiber.
